

"NEITHER RAIN NOR SLEET NOR STORM OF NIGHT" CAN DAMPEN YOUR HOMECOMING WITH THE

MODEL 300 **SEDCON** AUTOMATIC DOOR OPERATOR

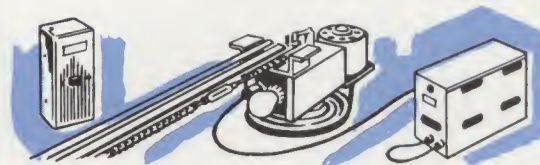

For all single
and double width
residential
garage doors

THE NEW LOW COST
OPERATOR WITH THE
HIGH PRICED PERFORMANCE

2 Ways to Enjoy Push-Button Control

1. **ELECTRIC KEY**—controls opening and closing from fixed position on drive—easily reached from car—and in your garage.

2. **REMOTE CONTROL**—Order with operator, or at any later time. Diagram of components including receiver shows simple plug in—takes only five minutes to install and connect.

Certified for compliance with FCC Regulations.

with PORT-A-MATIC
the ultimate in convenience

It's the smallest and most efficient transmitter of its type, 5" x 2" x 1". Carry in purse or glove compartment, or use magnetic mount to fasten to any metal surface. Just push the button. Opens door from as far as 150 feet from garage.

EASY TO INSTALL—Door operator pre-assembled at factory. No complicated wiring. No "putting it together" on the job.

DESIGNED, PRODUCED AND GUARANTEED by garage door manufacturer. Quality construction, with advanced safety features you'll enjoy.

Now at last you can obtain a real remote control garage door operator at truly economy cost but with deluxe features usually found only in high priced units. Your operator comes preassembled. No kit to struggle with, nothing to put together. You get positive control of door in all positions, with safety, convenience and economy never before offered in an operator of this type. Just compare the features below with those of **any** operator at **any** price!

DOLLAR FOR DOLLAR THE BEST YOU CAN BUY

- Ruggedly built to last

THIS EASY LOW COST WAY

THE MODEL 300
SEDCON OPERATOR

TOP QUALITY PERFORMANCE ALL THE WAY

The Sedcon Model 300 garage door operator is not only easier to buy and easier to install, but gives you top quality performance. That's because it is precision made of fine materials and backed by one of the largest garage door manufacturers with over a half century of experience in producing garage equipment.

SEDCON INSTALLATION — Note trim compactness of unit. Only $1\frac{3}{4}$ " headroom needed above high point of door arc. Control is pre-wired. Just plug in to any 110 volt AC outlet. Operates both sectional and one-piece doors.

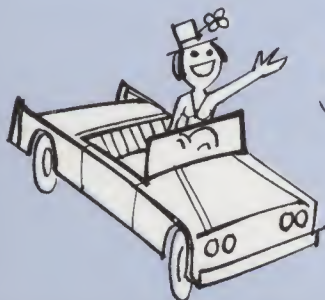

Quick release bracket permits emergency manual operation of door. Re-attaches instantly to door for power operation.
